REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The primary reason for the allowance of the claims is the inclusion in claim 1 of the limitations directed to the screw rod having a base end thereof pivotally supported on the frame and a displacement member provided between a floor panel and the screw rod and held in threaded engagement with the screw rod for translational movement according to rotation of the screw rod, and the tilting mechanism being adapted to tilt up and down the floor panel by way of a pivoting point provided at a base end of the screw rod and a displacement point provided at the displacement member and translated to an arbitrary position, tilting up the floor panel in forward direction to a degree commensurate with a distance of travel of the displacement point in forward direction. Such limitations, in combination with the rest of the limitations of the claim, are not disclosed or suggested by the prior art of record. Also, a double patenting rejection was considered in relation to claims 10 and 11 of US Patent Application 10/550,730. However, the current claims include limitations, including the location of the engine in the machine and the relationship between the screw rod and frame, which are not found in the claims 10 and 11 of US Patent Application 10/550,730 and are not obvious modifications.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
